SECTION 2 - ENVIRONMENTAL MANAGEMENT SYSTEM POLICY

2.1 WTS Environmental Protection Policy

Environmental protection is of critical importance to Waterston Terminal Services. LLC The goal of WTS is to conduct every company managed operation so as to ensure prevention of human injury or loss of life, avoid damage to the environment, particularly the marine environment, and property loss or damage.

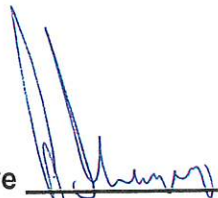

Therefore, in developing daily operational processes and "work products", WTS is committed to develop, implement, and maintain/monitor standards of safety and environmental protection through companywide efforts. This includes but is not limited to identifying potential pollution risks to proactively develop means of preventing pollution and reduce environmental risks as well as sharing this information with stakeholders.

The specific objectives of our environmental protection policy are to:

- Maintain Zero Tolerance Policy for Spills or damage to the environment
- Protect the environment, specifically the marine environment; and
- Establish policies and procedures to safeguard against all identified risks to life, environment, and property.

In order to achieve the above objectives WTS has voluntarily developed an Environmental Management System that endeavors to maintain compliance with the following state, local, federal, and international mandatory rules, and regulations.
